HEADQUARTERS, DEPARTMENT OF THE ARMY

31 JANUARY 1994

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

## SECTION I - INTRODUCTION

## 1. GENERAL.

a. This catalog provides an alphabetical listing of the Medical Materiel Set (MMS) Medical Maintenance: DEPMEDS (M321).\*

b. The component listing/hand receipt is identified by a four-segment symbol:

(1) The first segment (SC) indicates Supply Catalog.

(2) The second segment (6545) identifies the Federal Supply Classification (FSC).

(3) The third segment (8) identifies the compiler.

(4) The fourth segment (MQ8) distinguishes the SKO from others in the same FSC.

c. The title SKO is authorized by The Army Authorization Documents Systems (TAADS).

d. The term SKO in the SC introduction will be replaced by the specific title for each SC (i.e., MES, DES, MMS, etc.).

e. This Catalog is not an authorization for requisitioning NSN 6545-01-332-0147. Components listed may be requisitioned in quantities indicated when the set is authorized by Modification Table of Organization and Equipment (MTOE) or other Department of the Army (DA) authorization document(s).

## 2. PURPOSE.

This SC prescribes initial allowances and quantities of basic medical maintenance shop furniture, equipment, tools, and supplies to support the medical maintenance functions. This constitutes the minimum basic load to sustain this SC.

## 3. RESPONSIBILITY.

a. The Defense Medical Standardization Board (DMSB) is responsible for the overall management of the DEPMEDS MMS. The DMSB approves the composition of the DEPMEDS MMS. The Surgeon General (TSG) is responsible for budgeting and for the initial issue of the DEPMEDS MMS to include all procurement appropriation funded medical equipment.

\*Initial DEPMEDS SC issue.

b. USAMMA coordinates requirements with the Defense Personnel Support Center (DPSC). USAMMA performs staff-management actions as directed by TSG and as outlined in AR 40-61.

c. USAMMA develops the requirements; OTSG coordinates programming and budgeting from the proper appropriation (OMA, OMAR, OMNG, OPA, or Stock Fund\*\*) for procurement of newly developed or significantly revised MMS and for Associated Support Items of Equipment (ASIOE).

\*\*Reference AR 40-61 dated 01 August 1989, Section I, Abbreviations Glossary.

d. After initial fielding, MACOMs (in addition to OCAR and the ARNG) are responsible for follow-up requisitioning, storing, and maintaining those MMS and equipment authorized to be on-hand in TOE units or TDA activities. MACOMs program and budget for replacement of consumable and expense equipment components, and for minor changes to MMS on-hand at TOE units.

#### 4. EXPLANATION AND USE OF COLUMNS.

The following information is a brief description of the contents and layout of data provided to user(s) of this Supply Catalog:

a. ACT (Action Code). A one-position alphabetic code that records the action taken in a component list/hand receipt. They are:

C (CHANGE)	Indicates a change to the AMDF unit of issue, set measurement quantity/unit of issue, ARC, or Remarks Code since the previous publication.
D (DELETION)	Indicates the NSN has been deleted and not replaced.
N (NEW)	Indicates the NSN was not previously included in the basic publication or changes.
R (REPLACEMENT)	Indicates the NSN has been replaced or changed.

b. ILLUSTRATION/NATIONAL STOCK NUMBER (NSN). Not all the NSNs in this SC are represented by an illustration. The items that have an illustration show an illustration number in the "ILL NO" column of the CL/HR. For easy reference, the illustration number is also listed under each illustration.

(1) The illustrations may not be exact representations of the items in the assemblage since the products of the various manufacturers may vary in appearance.

(2) A cross-reference list of NSN-to-Illustration Number is provided as Section V. This list is in NSN sequence and will further assist in identifying NSNs that have an illustration.

c. ITEM DESCRIPTION. The item descriptions are listed in alphabetical sequence by item name with additional

c. ITEM DESCRIPTION. The item descriptions are listed in alphabetical sequence by item name with additional descriptive information required for identification.

(1) The first description shown is that of the MMS. Subsequent descriptions are for the components by item names in alphabetical and ascending size sequence within each Accounting Requirements Code (ARC) group (i.e., N, D, and X).

(2) The statement "Item Not Illustrated" indicates that an illustration should not appear.

(3) Manufacturer's code, part number, and/or the applicable specification references follow the description, when applicable.

d. RMKS (REMARKS). Space reserved for notes which are explained in the "Special Information" paragraph.

e. ARC (ACCOUNTING REQUIREMENTS CODE). This is a one-position alphabetic code that identifies the way an item is accounted for by the Army. One of the following codes must be entered here.

N-NONEXPENDABLE - This code identifies identifies items which are not used up and keep their identity

throughout their life and must be accounted for in the property book.

D-DURABLE - This code identifies items which are not used up. These items keep that identity throughout their life. Items identified by this code are accounted for by hand-receipt or other similar documents.

X-EXPENDABLE - This code identifies items which will be used up. These items do not need to be entered on hand receipts; however, preprinted hand receipts list expendable items for information purposes only.

f. CIIC (CONTROLLED ITEM INVENTORY CODE). This is a one-position alphabetic/numeric code which indicates the security classification, security risk, or pilferage controls required for storage and transportation of DOD assets, DA PAM 710-2-1 identifies those items that must be inventoried monthly. The CIIC Code applicable to components of this SC unless otherwise indicated in the CIIC column, is U (UNCLASSIFIED).

g. UI (UNIT OF ISSUE). This is a two-position code which shows the smallest quantity in which an item can be requisitioned and issued.

h. PEC (PRIMARY ESSENTIAL CODE). The revised editions of AR 40-61 and AR 200-1 will eliminate the requirements for PECs for Equipment On Hand (EOH) computation procedures. References to PECs in the future UA Listings (UAL) and Supply Catalogs (SCs) will not be shown.

i. QTY AUTH (QUANTITY AUTHORIZED). This is the quantity authorized to be on-hand for each end item or component of an end item.

j. QUANTITY ON HAND (A Thru F). These columns are for the actual quantity on-hand for each component listed.

##### 5. ABBREVIATIONS:

Standard abbreviations are listed in AR 310-50 (Authorized Abbreviations and Brevity Codes) and the DoD Medical Catalog Introduction (Authorized Abbreviations Referenced to Terms). Some words will be truncated (with vowels removed that do not meet the above references) in order to fit a limited-space nomenclature field. Army acronyms used in this SC are defined in AR 40-61, Glossary, Section I Abbreviations. Nonstandard abbreviations listed and used in this publication are:

#### 6. SPECIAL INFORMATION.

a. The items listed in Section III of this SC beginning with Page III-03 are ASIOE end items dedicated to the operation and/or maintenance of this medical assemblage.

b. ASIOE are separately documented into TOE/The Army Authorization Documents System (TAADS) and are not to be considered components of this medical assemblage.

c. They are listed in this section for information purposes only and do not constitute an additional authorization. Total authorization is reflected on the Unit's MTOE.

\*\*\*2 indicators will still be reflected in the Remarks column of this report noting these items will appear in Section II of the Unit Assemblage List (UAL). THE ITEMS ON THIS REPORT WITH \*\*\*2 INDICATORS WILL NO LONGER APPEAR IN THE SECTION II HAND RECEIPT PORTION OF THIS SC.

The previously used \*\*\*3 indicators have been removed and those items are now part of the Section II hand receipt portion of this SC.

d. To assist physicians in prescribing items initially supplied with this set, a Therapeutic Index constructed in accordance with the American Hospital Formulary Service (AHFS) is provided on page IV-01. The Therapeutic Index may not be required for all SCs. This index lists the FSC 6505 components of the major assemblage with a therapeutic classification in NSN sequence within each therapeutic class.

**NOTE: THIS SC DOES NOT CONTAIN ANY SECTION IV INFORMATION**

e. Permission to use the Pharmacologic-Therapeutic Classification Systems of the AHFS has been granted by the American Society of Hospital Pharmacists. The Society is not responsible for the accuracy of transpositions, or additions, or excerpts from the original context. For complete information concerning all drugs, consult the AHFS, copyright 1959-1987, American Society of Hospital Pharmacists, Inc., All Rights Reserved.

f. REMARKS COLUMN: The symbols shown in the Remarks Column apply to this SC only and include the following:

- F - Subject to Damage by Freezing
- G - Requires refrigeration between 2 degrees to 8 degrees Centigrade (35 degrees to 46 degrees Fahrenheit)
- I - Flammable or Oxidizing
- P - Potency-Type Items
- \*\*\*2 - ASIOE Items

g. COMPONENTS LISTINGS.

(1) To support Army Medical Department Activities, USAMMA also provides floppy disks for UA component listings in lieu of hard-copy versions. For each UA requested, the disk will consist of UA information in raw data format and a report file which is in the same two-section format as the current hard-copy component listing. A brief instruction guide on "How to Access and Print the Information" is included on the disk. Additionally, a separate enclosure with the data record layout of the raw data will be included to allow the

user to merge the data with the user's existing software, i.e. DBase, Lotus, or Paradox.

(2) USAMMA will not send a hard-copy version of the component listing to those activities that have the floppy disk system. Only one method of receiving listings is allowed. The disk will be furnished just once during the current year. Only the addition of a new set by MTOE update will permit the release of additional disks. Commands responsible for more than one unit should indicate this and furnish the various UICs and UAs under their command on their request. It is recommended that this original USAMMA disk be copied to your hard drive and the USAMMA disk be retained as the official record.

(3) Once an activity receives their initial UAs on disk(s), their address will be retained for an automatic distribution of the succeeding year's annual update via disk. Activities that have automated capabilities and choose the disk method, should send their complete address and UIC along with all UAs authorized under that UIC to:

Commander  
U.S. Army Medical Materiel Agency  
ATTN: SGMMA-OCU  
Fort Detrick  
Frederick, MD 21702-5001

(4) Component authorizations are published in medical materiel set computer listings/floppy disks available from USAMMA and in the appropriate supply catalogs (SC 6545-8 Series publications). Revisions

to components are published annually in the DA SB 8-75 Series Publication and are reflected in current year computer listings/floppy disks.

(5) Publication of component authorization changes in the SB 8-75 Series Publication (and/or a current year medical materiel set computer listing/floppy disk) constitutes authority for updating assemblages in respective units and serves as the authorization document of assemblage component.

(6) Commanders of DEPMEDS Units will continue to utilize the UA list initially fielded with the unit until authorized for update by USAMMA. This may result in the use of several UA listings with different dates for different assemblages until a single, current year update is provided by USAMMA. Commanders should annually request a current year medical unit assemblage listing/floppy disk by submitting written requests to:

Commander  
U.S. Army Medical Materiel Agency  
ATTN: SGMMA-OCU  
Fort Detrick  
Frederick, MD 21702-5001  
Telephones: DSN 343-4318  
COMM 301-619-4318

The request should identify the unit assemblage (UA) number, Nomenclature, Line Item Number (LIN), or NSN for each medical materiel set required.

(7) Commanders who do not have automated capabilities and need the hard copy

listing should continue to request a current-year medical materiel UA listing by submitting written requests to the aforementioned address. The request should identify the UA Number, Nomenclature, Line Item Number (LIN), or NSN for each medical equipment set required.

e. AMDF INCOMPATIBILITIES. If incompatibilities are discovered between this publication and the AMDF (Army Master Data File), the latter will govern.

f. SECTION VI, NSNS DELETED FROM PREVIOUS PUBLICATIONS AND APPLICABLE REPLACEMENTS.

(1) This Section appears in all editions subsequent to the previous edition of the Supply Catalog.

(2) It includes all deletions and replacements made to Section II since the previous edition.

**NOTE: THIS INITIAL ISSUE DOES NOT CONTAIN  
A SECTION VI**

## 7. ACCOUNTABILITY.

a. Page II-2, Section II (FROM:) identifies the element from which the property is issued. Enter the name of the organization, unit, section, or squad which issues the property.

b. The block (TO:) identifies the element to which the property is issued. Enter the name and rank of the person receiving the property. TOE/MTOE paragraph, line number, and job title may be added as optional information.

c. HAND RECEIPT NUMBER: Enter a locally assigned number.

d. END ITEM STOCK NUMBER: Enter the NSN of the MMS.

e. END ITEM DESCRIPTION: Enter a short description of the MMS.

f. PUBLICATION NUMBER: SC Number.

g. PUBLICATION DATE. SC Effective Date.

h. QUANTITY ON HAND: These columns are for the actual quantity-on-hand for each component listed.

(1) Enter the quantity on-hand for each component listed. Line out all unused blocks in columns with recorded quantities.

(2) Advance all quantities to the next column when quantities change. Quantities must be advanced when changing hand-receipt holders.

(3) The person receiving the property will sign, enter his/her rank, and date the proper quantity column on the last page (ink entry). The last page is the last-numbered page and

may be an odd or even number. The last page may be reserved for signature only. (The original page will have an original signature; the copy may have a carbon signature.)

#### 8. TRANSPORTATION INFORMATION.

a. Supplies will be packed in containers suitable for operations under field conditions.

b. Packages or containers will ordinarily be of such size and weight as to permit handling by two soldiers.

c. When practicable, crating will be such as to permit equipment to be readily accessible by removing the front, side, or top of the container.

d. To reduce the overall bulk when this assemblage is packed by the Depot, empty chests which appear as components on the equipment list will be utilized wherever possible as shipping containers.

e. The following information is applicable to this MMS. Weight given is in pounds (LBS) and Volume is in Cubic Feet (CU FT). Total Weight and Volume of this MMS:

Weight: 8,749.20  
Volume: 1,403.763

9. POWER REQUIREMENTS. An external power source is required to support this MMS. The following NSNs operate on 115V, single-phase power with wattage requirements as shown:
